

Activity: Prototyping a Green Map

Notes

With a group and paper maps, we will take a walk to map green features in the area nearby.

Map as you go! We will come back as a group and share our map prototypes and the process.

Remember!

- **Prototypes** are messy, the goal is getting an idea out into the world, not about having a perfect or final edition
- Anything can go on the map you'd like – “things that you can see, or maybe other kinds of information that is important to you.”
